

HypoDoc Slide Surface

cross-renderer fixture

1

Rendering Contract

Rendering Contract

1.1

Shared Structure

One Source, Ordered Frames

Frame Goal

Keep source order, semantic blocks, and frame identity stable across preview and PDF.

- H1 and H2 provide presentation context.
- H3 begins a titled frame.
- A thematic break creates a continuation frame.

One Source, Ordered Frames (continued 2/3)

The continuation keeps the same title and receives its own stable frame ID.

Math And Code

Inline math remains readable: $E = mc^2$.

Command

```
const surface = "hypodoc.slide-deck/v1";
```

1.2

Evidence

Comparison Table

表: Cross-renderer surface map

Surface	Expected evidence
Waterfall	Ordered frame IDs
Presentation	Keyboard navigation
PDF	Matching semantic content

Completion

Review Signal

The deck is ready when every renderer preserves the same content membership.
